

Looking for a cool and educational activity for your school?

DON'T DELAY - RESERVE **WAX HANDS** TODAY!

www.kaostatattoo.ca

Wax Hands offers “hands-on” experience with changing states of matter and colour pigmentation. Kids first feel liquid changing to solid on their skin and then watch dye colour permeate the wax cast to produce a unique and colorful impression of their hand - to take home as a souvenir!

The fun never ends as kids and educators try different hand signs and shapes. Everyone, from age 5 to 99, is fascinated by this activity.

Here's how it works:

1- We dip your hand in ice-cold soapy water. You make a sign or shape with your hand and we dip it in warm, melted wax. DON'T WORRY - it doesn't burn or hurt.

2- We quickly move your wax covered hand into icy water where the wax instantly solidifies. We repeat the wax dip a few times to strengthen the wax cast and return the hand to icy water for a final dip

3- We gently remove wax from the hand - it slips right off!

4- Finally we dip the wax hands in your choice of colour(s) - we can even make a rainbow!

Activity Package includes two expert attendants, with a capacity of 30 to 40 hands per hour. Minimum 2-hour reservation required. Airbrushed temporary tattoo services also available-another event favorite!
